

**Amendments to the Specification:**

Please replace paragraph [0012] with the following amended paragraph:

**[0012]** The present invention is further described in the detailed description which follows, with reference to the noted plurality of drawings by way of non-limiting examples of exemplary embodiments of the present invention, in which like reference numerals represent similar parts throughout the several views of the drawings, and wherein:

Fig.1 illustrates a configuration of a network that connects a server with a plurality of terminal apparatuses;

Fig.2 illustrates, in block diagram fashion, a configuration of the server;

Fig.3 illustrates, in block diagram fashion, a configuration of a terminal apparatus connected with the server;

Fig.4 illustrates an example of a structure in which document data are stored in the server;

Fig.5 illustrates an example of information stored in a document information table of the server;

Fig.6 illustrates an example of information stored in a user management information table of the server;

Fig.7 illustrates an example of information stored in a document management information table of the server;

Fig.8 illustrates an example of information stored in an access right information table of the server;

Fig.9 illustrates a flow chart describing an operation performed between the server and the terminal apparatus when a client reads a document data stored in the server;

Fig.10 illustrates a flow chart describing an operation performed in ST 912 of Fig.9;

Fig.11 illustrates an example of a log file stored in a memory of the server;

Fig.12 illustrates a flow chart describing an operation for selecting a water-mark in the server;

Fig.13 illustrates a flow chart describing an operation for deleting a cache area in the server;

Fig.14 illustrates a flow chart describing an operation performed between the server and the terminal apparatus when the terminal apparatus sends a print instruction to the server;

Figs. 15a and 15b illustrate ~~Fig.15 illustrates~~ two samples of document data with a water-mark displayed at the terminal apparatus;

Fig.16 illustrates a sample of a document data with a water-mark printed out; and

Fig.17 illustrates a sample of an original document.
